Software Developer

An innovative software developer passionate about Software Architecture, Design Patterns, and Test-Driven Development (TDD). Expertise in using Python to develop and implement software solutions. Collaborate with product teams to enhance existing solutions and elevate software quality. Work with both front-end and back-end technologies and have a good understanding of DevOps techniques. Dedicated personal studies to statically typed languages and building projects using Domain Driven Design especially Rust.

Key Skills

Software Development | Backend Development | Frontend Development | Software Architecture & Design | Testing | REST APIs | gRPC | Relational Databases | Microservices Architecture | SOLID principles | Event Driven Architecture | TDD (Test-Driven Development) | Hexagonal Architecture | Domain-Driven Design | Cloud Computing

Technical Knowledge

Python (Django, Flask, FastAPI, Celery, SQLAlchemy), JavaScript / TypeScript (React.js, Vue.js), Go (Gin, sqlx), Rust (Axum, Diesel, sqlx), PostgreSQL | MySQL / MariaDB | Docker | RabbitMQ | Redis | Kubernetes | Terraform | CI / CD (AWS, Google Cloud Platform, GitOps)

Relevant Experience

FreshBooks - Ontario, Canada

Senior Fullstack Developer

03/2023 - 04/2023

- Evolved several Python applications using Flask Framework and MySQL through SQLAlchemy.
- Created new microservices with FastAPI enabling the connection of over 100.000 bank accounts.
- Performed requirements analysis and road-mapping.
- Coordinated a team of 4 developers.

Fullstack Developer - Amsterdam, The Netherlands

05/2020 - 02/2023

- Oversaw evolution of several Python applications using Flask Framework and MySQL through SQLAlchemy.
- Created new microservices with Django Framework.
- Evolved the Ember.js codebase.
- Contributed to architectural decisions to improve the microservices infrastructure.

KPN Technium - Amsterdam, The Netherlands

Fullstack Developer

04/2019 - 05/2020

- Maintained Python/Django applications to provide OAuth2 and OpenID authentication protocols in Password and Credentials flows, as well as managed user privacy settings.
- Prepared the applications to move from on-premise infrastructure to the cloud, using Kubernetes.
- Developed a new responsive frontend using Vue.js for web and mobile-embedded webviews
- Participated in the Incidents Management Team.

BR MED - Rio de Janeiro, Brazil

Fullstack Developer

07/2017 - 04/2020

- Evolved and refactored an 8-year-old ecosystem of applications written in Python/Django and Ruby with Sinatra and Rails.
- Migrated the main application from isolated installations to a multi-tenant cluster reducing the infrastructure costs on 30%
- Updated the Amazon AWS infrastructure update using Ansible Kops, Kubernetes, and Docker.
- Focused on architecture restructuring, applying Hexagonal Architecture and Domain Driven Design.

Simple Fractal - New York, USA - Remote

Freelancer Backend Developer

07/2016 - 05/2017

- Developed several small projects using Django and Django-Rest-API
- Implemented Frontends using React.JS
- Implemented Server Side Rendered (SSR) workflows using Django-admin

Carta (Former eShares) - California, USA.

Backend Developer

02/2016 - 07/2016

- Implemented new backend functionality in the existing system using python and Django
- Implemented new functionality in the existing frontend using KnockoutJS
- Implemented testing on legacy code
- Provided guidance on application design and testing

Parafernalia Interativa - Rio de Janeiro, Brazil

Backend Developer

08/2015 - 01/2016

- Refactored backends in Django to decrease the loading time of pages by over 1000% (from 10s to less than 1)
- Implemented new functionalities in backend (Django) and Frontend (AngularJS)
- Implemented Continuous integration on Amazon Ubuntu and CentOS servers and reduced the costs of infrastructure on 80%

Aos Fatos - Rio de Janeiro, Brazil

Founder / CTO

06/2015 - 06/2019

- Planned and execution of all the technological infrastructure for the aosfatos.org portal, using Python/Django, vanilla JS, and AngularJS.
- Worked in the concept with the platform with my associate to define the necessary features
- Created and published an MVP in a private server
- Iterated over the product adding functionality and creating a more robust infrastructure
- Developed of a chatbot using Python/Bottery/Chatterbot and connected to FaceBook, Telegram and Whatsapp

Education

- Bachelor Degree in Computer Sciences at Federal University of Rio de Janeiro (UFRJ), Brazil (Incomplete).
- Technical License in Electricity - Federal Center of Technology Education of Rio de Janeiro - CEFET/RJ, Brazil
- Bachelor Degree in Social Communication Bachelor Degree with a Major in Public Relations (University of the State of Rio de Janeiro), Brazil

Languages

Fluent English | Advanced Spanish | Native Portuguese | Basic French
